

# Theory of Elasticity

Liping Liu

January 17, 2012

## Contents

<b>1 Preliminaries</b>	<b>3</b>
1.1 A review of linear algebra . . . . .	3
1.2 The divergence theorem . . . . .	7
1.3 Curvilinear coordinate systems . . . . .	10
<b>2 Kinematics</b>	<b>11</b>
2.1 Geometric interpretation of the deformation gradient . . . . .	11
2.2 Small strain and linearization . . . . .	12
2.3 Transformations of a deformation gradient . . . . .	13
2.4 Compatibility conditions . . . . .	15
<b>3 Concepts of Stress</b>	<b>19</b>
3.1 Cauchy stress and balance laws . . . . .	19
3.2 Implications of the first and second laws of thermodynamics . . . . .	20
<b>4 Constitutive Laws</b>	<b>22</b>
4.1 Hooke's law . . . . .	22
4.2 Frame indifference and material symmetry . . . . .	23
4.3 Approximation of the stored energy functions . . . . .	24
<b>5 Formulations of Linear (Linearized) Elasticity Problems</b>	<b>25</b>
5.1 PDE formulation, Variational formulation, Weak formulation . . . . .	25
5.2 Uniqueness of the solution . . . . .	26
5.3 Plane strain problem . . . . .	28
5.4 Antiplane shear problem . . . . .	29
5.5 Plane stress problem . . . . .	31
<b>6 St Venant's Problems and Semi-inverse Method</b>	<b>33</b>
6.1 Simple extension . . . . .	35
6.2 Pure bending . . . . .	35
6.3 Torsion . . . . .	36
6.4 Bending . . . . .	38

<b>7</b>	<b>Important Problems and their Solutions</b>	<b>39</b>
7.1	The fundamental solution — Kelvin’s solution . . . . .	39
7.2	Pressured vessel . . . . .	43
7.3	Half-space problem — Boussinesq’s solution . . . . .	45
7.4	Contact problem — Hertz’s solution . . . . .	50
7.5	Inclusion problem — Eshelby’s solution . . . . .	56
<b>8</b>	<b>Introduction to Micromechanics</b>	<b>61</b>
8.1	Cracks . . . . .	61
8.2	Composite materials . . . . .	61
8.3	Dislocations . . . . .	61
8.4	Plasticity . . . . .	61
<b>9</b>	<b>A Hierarchy of Plate Theories</b>	<b>61</b>
9.1	Kirchhoff-Love plate theory . . . . .	61
9.2	von Karman plate theory . . . . .	61
9.3	Mindlin plate theory . . . . .	61
<b>10</b>	<b>Waves in Solid Structures</b>	<b>61</b>
10.1	Bulk waves . . . . .	61
10.2	Surface waves . . . . .	61
10.3	Interfacial waves . . . . .	61
