What do you like best about this course?

Comments
I really liked my instructor and how she was positive and genuinely wanted to help us to learn and overcome the difficulties without directly giving the answer.
I liked the flipped classroom idea. Also the way lecture was lead.
The teaching style of a flipped classroom.
I liked that not all of the practice and application happened outside of class. It benefitted me greatly to have the instructor helping me work out problems before I had to do them on my own. Also, I very greatly appreciated that my instructor set aside so much time for office hours, ultimately amounting to the same number of hours as in-class time.
How fast we're required to learn things makes it easier to remember by the time exams come around.

If you were teaching this course, what would you do differently?

Flipped classroom during regular semester
Maybe more in-class example problems.
The material was sometimes presented in a little unorganized manner.
Nothing it was taught perfectly.
I thought that the pre-class homework and in-class practice worksheets were not enough preparation for our daily closed-note quizzes. In practice, I rarely finished the worksheets before having to take a quiz, and the quizzes occasionally included material that we encountered for the first time that day in class. I would have preferred at least an additional day after the lecture to study for the quizzes, especially since the quizzes were worth more than the Sapling assignments but we were able to use our notes for Sapling.
Nothing, my instructor was amazing.

In what ways, if any, has this course or the instructor Chloe Wawrzyniak encouraged your intellectual growth and progress?

Encouraged learning well
I stayed after with her after class and she encouraged me regarding my test anxiety and gave me tips on how to prepare for exams, and told me not to doubt my knowledge and the work that I've put in. It was extremely encouraging and it genuinely made me feel better about how I was approaching this class despite its difficulty.
more practice in class
Interested in helps the student actually learn and makes an effort to make sure everyone understands the concepts.
He has she accelerated my learning speed as well as encouraged me to pursue my interest in math.
She is really nice and is always willing to help, which makes it easier to talk to her.
Hey Chloe, I just wanted to say thank you for replying to my Reddit post. If it wasn't for you, I'd probably be in another section failing miserably. As someone who had to retake 135 because I failed it my first semester, I went into 152 with low expectations. Because of the flipped classroom approach, your wonderful style of teaching, as well as your clear and concise lectures, I was able to regain my confidence in math. And as of now, I'm satisfied with what my grade is. I truly think you're an amazing teacher (probably the best I've had so far) and anyone who says otherwise is wrong. Your effort, kindness, and passion for teaching does not go unnoticed. Thank you for teaching me Calc 2 and good luck in your future endeavors.
