What do you like best about this course?

These comments are intended for all instructors.

Comments
Coming to class did not feel like a chore.
The course is not as hard as people always said it was
I liked the recitations Corrine was an amazing TA she always made the confusing things make sense. She just had a way of explaining things that made things click for me.

If you were teaching this course, what would you do differently?

Comments
Make the homework due before quiz
I would either eliminate the online sapling homework or the workshop assignments. They felt like busy work, and the sapling homework did not relate to exam problems in my opinion.
I wouldn't change anything.

In what ways, if any, has this course or the instructor Corrine Yap encouraged your intellectual growth and progress?

These comments are unique to the instructor Corrine Yap.

Comments
Always explained things in an easy to understand way and made calculus fun which I never would have thought possible.
Her interest in the material and effective way of explaining concepts during recitation helped me have a better understanding of what we would learn from lecture.
She taught differently than the professor himself so when I did not understand something from class, she ended up making me learn what I did not learn during regular class time. She was awesome all throughout.
I like how the workshops were structured
I really appreciated that you tried everything to give us the preparation we needed to succeed in this class. The fact that you went out of your way to organize a virtual review session even in the midst of you being out of state was really respectable and something I really appreciated. Thank you for a great semester!
