What do you like best about this course?

Comments
The content and teaching style
Dr. Z is a very effective teacher and always encourages his students. This course is very good as an introduction to maple and as a introduction to whichever topic Dr. Z is teaching at the time. The experimental approach that he encourages serves to make sure that one gets a good understanding of the material at hand by interacting with it -- other courses in mathematics do this in a much more roundabout way, so having taken this course is a great way to realize that there are more ways to experiment with math than just on paper
Despite being new to programming, I found the course incredibly beneficial. Even though I sometimes struggled with homework due to my inexperience, these challenges turned into valuable learning experiences, equipping me with new problem-solving skills and programming techniques.

If you were teaching this course, what would you do differently?

Can't do better!
If I were teaching this course, I would request that Dr/ Z teach it instead -- the way he approaches this course is unlike any other in math.
I might spend more in-class time discussing mathematical content instead of writing maple programs

In what ways, if any, has this course or the instructor Doron Zeilberger encouraged your intellectual growth and progress?

These comments are unique to the instructor Doron Zeilberger.

Comments
He is very enthusiastic and his joy for learning is infectious!
The course is very well designed and Dr Z's teaching style is very hand's on and promotes learning.
I liked that Dr. Z. consistently brought great enthusiasm and energy to the classroom. He makes every student feel valuable to the classroom environment. I also liked that he almost always offered extensions/challenges on homework assignments.
