**Important note**: Unlike Exams 1 and 2, you are not required to state the type of the answer, and there is no credit for stating the type. But if the given answer is the **wrong type**, you would get 0 points.

Example: Find f'(2) if  $f(x) = x^3$ . If you give the answer  $3x^2$  instead of 12, you would get **zero** points!
