Journal of Fixed Point Theory and Applications
All Volumes & Issues

Volume 15, Issue 1, March 2014

The Haim Brezis Festschrift

ISSN: 1661-7738 (Print) 1661-7746 (Online)

In this issue (10 articles)

News

Prof. Haim Brezis

Page 1

OriginalPaper

On certain mathematical models in continuum thermomechanics

V. G. Zvyagin, V. P. Orlov

Pages 3-47

OriginalPaper

Geometry, dynamics and different types of orbits

A. T. Fomenko, A. Yu. Konyaev

Pages 49-66

OriginalPaper

Metric regularity, fixed points and some associated problems of variational analysis

Alexander D. Ioffe

Pages 67-99

OriginalPaper

Solitons in Schrödinger-Maxwell equations

Vieri Benci, Donato Fortunato

Pages 101-132

OriginalPaper

Strong approximation of fractional Sobolev maps

Pierre Bousquet, Augusto C. Ponce...

Pages 133-153

OriginalPaper

A new obstruction to the extension problem for Sobolev maps between manifolds

Fabrice Bethuel

Pages 155-183

OriginalPaper

Estimates for the topological degree and related topics

Hoai-Minh Nguyen

Pages 185-215

OriginalPaper

Variational analysis of a mesoscale model for bilayer membranes

Luca Lussardi, Mark A. Peletier...

Pages 217-240

OriginalPaper

A thin-film limit in the Landau–Lifshitz–Gilbert equation relevant for the formation of Néel walls

Raphaël Côte, Radu Ignat, Evelyne Miot

Pages 241-272

In this issue (14 articles)

OriginalPaper

Limiting Bourgain–Brezis estimates for systems of linear differential equations: Theme and variations

Jean Van Schaftingen

Pages 273-297

OriginalPaper

Symmetry in nonlinear PDEs: Some open problems

Adriano Pisante

Pages 299-320

OriginalPaper

Fractal zeta functions and complex dimensions of relative fractal drums

Michel L. Lapidus, Goran Radunović...

Pages 321-378

OriginalPaper

Solutions of higher topological type for an Allen–Cahn model equation

Jaeyoung Byeon, Paul H. Rabinowitz

Pages 379-404

OriginalPaper

Hardy–Sobolev inequalities for the biharmonic operator with remainder terms

Tommaso Passalacqua, Bernhard Ruf

Pages 405-431

OriginalPaper

Nonlinear extensions of the Perron–Frobenius theorem and the Krein–Rutman theorem

K. C. Chang

Pages 433-457

OriginalPaper

On some mathematical model of turbulent flow with intensive self-mixing

Pages 459-472

M. Burnat

OriginalPaper

On the approximate differentiability of inverse maps

Luigi D'Onofrio, Carlo Sbordone...

Pages 473-499

OriginalPaper

On the distance between homotopy classes of maps between spheres

Shay Levi, Itai Shafrir

Pages 501-518

OriginalPaper

Positive solutions for nonlinear nonhomogeneous Neumann equations of superdiffusive type

Nikolaos S. Papageorgiou...

Pages 519-535

OriginalPaper

Borderline gradient continuity of minima

Paolo Baroni, Tuomo Kuusi, Giuseppe Mingione

Pages 537-575

OriginalPaper

The validity of the Euler–Lagrange equation for solutions to variational problems

Arrigo Cellina

Pages 577-586

OriginalPaper

Insertion of bubbles at the boundary for the Ginzburg–Landau functional

Rémy Rodiac, Etienne Sandier

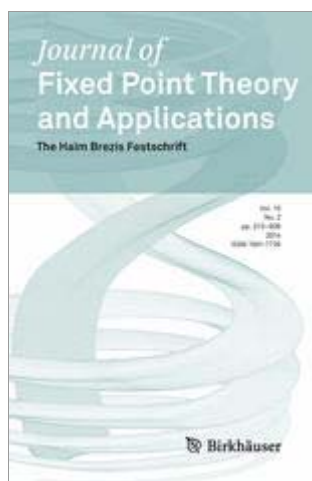

Pages 587-606

Erratum

Erratum to: Metric regularity, fixed points and some associated problems of variational analysis

Alexander D. Ioffe

Pages 607-608
