The dimension formula in Exercise #11 (a) of Chapter 7.1.4 for the irreducible representation of $\text{Spin}(2n, \mathbb{C})$ with highest weight $\lambda$ is incorrect. The correct formula is the following.

$$\dim V^\lambda = \prod_{1 \leq i < j \leq n} \left\{1 + \frac{m_i + \cdots + m_{j-1}}{j-i}\right\} \prod_{1 \leq i \leq n-1} \left\{1 + \frac{m_i + \cdots + m_{n-2} + m_n}{n-i}\right\}$$

$$\times \prod_{1 \leq i < j \leq n-1} \left\{1 + \frac{m_i + \cdots + m_{j-1} + 2(m_j + \cdots + m_{n-2}) + m_{n-1} + m_n}{2n - i - j}\right\}$$

In this formula the sum $m_i + \cdots + m_{n-2}$ in the second product is taken to be zero when $i = n-1$. Likewise, the sum $m_j + \cdots + m_{n-2}$ in the third product is taken to be zero when $j = n-1$.

We thank Dr. Robert Zeier (Technische Universität München) for pointing out this error.
