What do you like best about this course?

These comments are intended for all instructors.

Comments
I like that this course's difficulty really does reflect the knowledge and foundation you gain from learning it.
The professors willingness to help.
Adequate preparation for exams because of constant quizzes/assessments
The organization of the professor and the ability to understand students questions and properly address students confusion.
I liked the different colors used in his notes because I am a visual learner.

If you were teaching this course, what would you do differently?

Comments
I would change the online homework to properly simulate quiz and exam questions.
I wouldn't do anything differently.
Change the grading system, doesn't seem too fair that final grade outcomes determine course grades
I would update the homework and the video quizzes. Many of the homework questions were on material we had yet to learn, and some of the homework problems had typos and technical glitches.

In what ways, if any, has this course or the instructor Joseph Guadagni encouraged your intellectual growth and progress?

These comments are unique to the instructor Joseph Guadagni.

Comments
The instructor makes class time worthwhile and engaging.
Dr. G is, without a doubt, one of the single best instructors I have ever had and is definitively the best math teacher I've ever had. He has a way of breaking down complex topics and a way of keeping my attention for the entirety of the lecture portion of the class, which is no small feat. I have a lot of respect for him as a teacher and as a person, and I appreciate that he, in turn, respects me and all of his students and makes an effort to meet us where we're at on both an intellectual and a personal level (ie I tolerated group work for him.)
He was one of the best professors I've had, taught complex subjects in an understanding matter yet didn't mull over unnecessary information. was very informative and concise, but was not an easy class
Lots of practice examples, encouraged understanding of the material with proofs etc
He taught mathematics in a clear concise manner that made it impossible to misunderstand if the student was attentive during class.
