What do you like best about this course?

These comments are intended for all instructors.

Comments
I liked how the structure of the class was built off of previous lessons.
Dr.G is helpful and responsible to everyone!!
Although the class was taught online, I felt that the professor did a very good job in presenting and teaching the material.
learn some calculus knowledge
the group discussion with classmate and the office hour.
Everything was well organized and materials were easily accessible. I enjoyed the zoom meetings and breakout rooms.
conceptual learning of calculus

If you were teaching this course, what would you do differently?

These comments are intended for all instructors.

Comments
I would do nothing differently!
nah
At the midnight learn math is one of the different. Some part like Optimization and Related rates is not easy to understand
I would make the breakout sessions optional because some students would meet but never talk or participate, so it was difficult to know if they even wanted to be there or if they just didn't understand. That made it difficult to help each other. The student could also be shy in groups because sometimes they were seen in lecture participating. I also would not have us use so many extra browsers. I think proctor track was enough and is the best. Last, when participating in class sometimes the responses/ feedback we get back were a bit too much and slightly rude. I know, sometimes it refrained me from participating.
break down each lesson more and spend more time breaking down example questions and exams to better understand the material

In what ways, if any, has this course or the instructor Joseph Guadagni encouraged your intellectual growth and progress?

These comments are unique to the instructor Joseph Guadagni.

Comments
Dr. G has helped me understand how to solve Calculus problems and how to justify them. The way he presented the notes was clear and very helpful. Thank you for a great semester and making Calculus make sense!
No
He really emphasized the external resources available outside of classroom lecture.

Other comments or suggestions:
