

Math 115A-2: Homework 1

Due: January 8, 2015

1. Send me an e-mail introducing yourself. Let me know if you like to be called something other than your registrar listing, and anything you think I should know about your background.
2. Read Sections 1.1-4 in Friedberg–Insel–Spence.
3. Do problems 1.2.1–4, 1.2.7, 1.2.8, 1.2.10, and 1.2.13. [This is not as long as it looks; four of the problems are quick computations.]
4. I will be out of town part of this week for a research commitment. Professor Manolescu will teach Friday's class. My office hours this week are M 1-2, T 2-3.
