640:300:H1 (10192) – Spring 2021 – MW-5 (3:20-4:40 pm, New Jersey time)

The class will be taught as "Remote Synchronous" via Canvas.

Attendance is expected at every class.

When selecting online courses, make sure your timezone makes it feasible to attend all synchronous meetings.

It is very important that you read the technology requirements. By signing up for this course, you agree to follow these instructions:

Technology requirements for math courses

Here is a short summary, but also read the whole webpage:

To take this course, each student will need access to the following:

(1) Reliable high speed internet.

(2) A laptop or desktop computer. If the computer does not have a built-in microphone and camera, a student will need a separate webcam and a mic.

(3) A scanner, or a phone camera with software for producing pdf documents from photos. (You may also be able to use your webcam to take a photo which can be converted to a pdf.)

Not all of these items will be needed at all times in every meeting of the course.

(4) **By signing up for a course in the math department, a student consents to have videos of themselves recorded as needed for authentication purposes.**

(5) You also need to have an official Rutgers Canvas account and be able to use Canvas. Classes are delivered by Zoom via Canvas; you MUST use the official Rutgers Zoom account!

Remote Synchronous:
The course will be run in a synchronous manner; the lectures, exams, and office hours will take place through Canvas (using Zoom). Lectures will be delivered live during the scheduled class time (just as exams, quizzes, workshops). Students will be able to interact and ask questions via chat and breakout rooms during the scheduled meeting times. The lectures will also be recorded for later reference, but students are expected to participate in the live classes.
