Comments
Prof has been extremely good at taking a intimidating topic and making it a lot more approachable. I especially appreciated the plethora of GeoGebra demonstrations and visualizations of concepts. I also really connected with his teaching style and wish other profs were like this.
Many videos related to multivariable calculus were linked; many of these videos would show real-world applications for multivariable calculus that made me more interested in the material.
The professor was patient and systematically solved problems to help us understand better.
The instructor is very nice.
