

Weekly Homework 11

Math 250

December 5, 2013

- A. Section 6.2: 9-15 all, 25-31 odds (in these problems, you do not have to find the QR factorization. Instead use the answers provided at the back of the book and do:
a) Verifying that Q is orthonormal and b) $A = QR$), 33-39 odds.
- B. Section 6.3: 1-8 all.
- C. Extra credit (5 points) 6.2 : 41-52 all.
