

MATH336 - HW#23

1. Out of 10 trials, both species survived in 2 of these cases. There were 7 cases in which the positive stable equilibria agreed with all 3 initial conditions.
2. Out of 10 trials, all species survived in none of these cases. There were 7 cases in which the positive stable equilibria agreed with all initial conditions.
3. Out of 10 trials, all 4 species survived in only 1 of them. There were 7 cases in which the positive stable equilibria agreed with all initial conditions.
4. Out of 10 trials, all 5 species survived in none of them. There were 7 cases in which the positive stable equilibria agreed with all of the initial conditions.
