

$$\frac{13}{57} \quad \frac{1}{58}$$

① pay with 3 19 coins and  
get back 4 14 dollar coins.

②  $109 - 95 = 14$

$$110 \cancel{95} / 14 = n \text{ at } 5/16 \text{c}$$

no

③  $37 - 16 = 21$

$16 \cdot 7 - 37 \cdot 3 = 1$

④
