

did come

7(1, 2, 3, 4, 5, 6)

didn't go

118121

PI

undergrad

Question 1: Who is the greatest mathematician according to google?

Leonard Euler

M1: #3

Question 2: What university did Dennis Dwork attend for undergrad?

What uni

Drexel University

did RA

Question 3: Where did RSA get their degrees from?

got their degree

Rutgers - NJ

from? (RSA)

At Shamir - Tel Aviv

Leonard Adleman - Berkeley

Part II

(a)  $\frac{7}{12} \rightarrow EF$

$\text{ceil}(\frac{7}{12}) = \frac{7}{12} \Rightarrow \text{ceil}(\frac{7}{12}) = 2$

$\frac{1}{2} + EF(\frac{7}{12} - \frac{1}{2}) \Rightarrow \frac{1}{2} + EF(\frac{1}{12})$

$\text{ceil}(\frac{1}{12}) = 12 \quad \frac{1}{2} + \frac{1}{12} + EF(\frac{1}{12} - \frac{1}{12}) = \frac{1}{2} + \frac{1}{12}$

(b)  $\frac{1}{2} + \frac{1}{12}$  is better because the two pieces are easier to cut!

(2)  $n \bmod 2 = 1, n \bmod 5 = 2$

$n = 7, 17$  #
