Eugene Kwan-Sang Ng

[5, 11, 1981, 1992, 3, 4, 0]

By Anna Zhebrun

Eugene Ng was born on June 28, 1953, in the Peoples Republic of China. In 1981, he defended his thesis on *Studies in the Goldbach Problem* under guidance of Ronald Joseph Miech at the University of California. He published 4 more papers and after that, it looks like he left the mathematical research field. Not much else is known about him.
