Abstract

Put the abstract here.

1 Section heading

1.1 Subsection heading

1.1.1 Subsubsection heading

Here is an example.

Here is a definition.

Here is a lemma.

Here is a theorem.

Proof using the proof environment.

Here is a conjecture.

Here is a remark.

The full list of environments defined by the style file is: `blank` - a new numbered paragraph, `claim` - Claim, `cond` - Conditions, `conj` - Conjecture `cor` - Corollary, `Def` - Definition, `diag` - Diagram, `lemma` - Lemma `prop` - Proposition, `qn` - Question, `result` - Result, and `theorem` - Theorem.

Also there are unnumbered environments: `aside` - Comment, `notn` - Notation, `proof` - Proof and `rem` - Remark.

Some maths commands are already defined, including , and for the reals, integers and natural numbers.

Please use italics when defining a word for the first time.

Put any acknowledgements here.
